

	NUMBER OF SITES REPORTED:	1
All sites		
LIST OF MONITORING/MEASUREMENT PROGRAMS		
	name/description/aim of the project	General measurement guidelines
	time frame of the project (start/end)	Long term observation
	measurement methods applied	Growth and yield data, standard soil analysis
	co-operative partners (if any)	Several
	measurement set (number of towers/plots/chronosequences)	Chronosequence, time series
	target area	Several project regions in Bavaria
	Repeat if more projects are run at the same site!	
LIST OF INSTRUMENTATION		
	name of the measurements	Growth and yield data, standard soil analysis
	location of the device (if applicable)	Mobile
	device(s) used	Yardstick, tape, altimeter, CN-analyzer
	calibration method of the device (if applicable)	Test length, standard solutions
	frequency of the measurement/temporal resolution	General 5 years, 1-5 years in forest regeneration, 10 years for soil
AVAILABLE MEASUREMENT DATA		
	This section should be handled together with the LIST OF INSTRUMENTATION, if applicable. Please leave the cell blank if the listed data is not measured. If it is measured, please fill in the method of the measurement (if different from the general method described in cell B11), the temporal coverage of the data, the possible temporal gaps, the data coverage, and any other relevant information.	
	Aboveground biomass	Wood volume
	Belowground biomass	No
	Dead wood	Wood volume
	Litter	On lelected sites
	Soil organic matter	TOC ==> SOM
	Net ecosystem exchange of CO ₂ (NEE)	No
	Total ecosystem respiration (R _{eco})	No
	Soil respiration	No
	Net primary production (NPP)	No
	Net ecosystem production (NEP)	No
	<i>Please list more, if necessary.</i>	
	Repeat the applicable sections for each measurement!	
AGGREGATED DATA		
	type of data	Stand data, Enterprise Data
	method of calculation	Simulation, arithmetic
	available data (from-to, gaps, data coverage)	Soil carbon
	Repeat as necessary!	
SITE 2	Repeat the above part of the questionnaire if you have more sites!
